

# SlickCut Saw Blades

## For Use On Reciprocating Saw

Made with a proprietary alloy tool steel LaserBest® SlickCut reciprocating Saw Blades run cooler and cut quicker with less operator fatigue than every competitors blade we tested.

### Features

- Exclusive SlickSilver Coating
- SlickCut blades outlast standard blades almost 4 to 1.
- Cut 4 times faster than standard blades.
- Runs Smoother and Vibrates Less
- Aggressive tooth design clear chips quickly.
- Less friction, Longer Wear

### Characteristics

We have two state of the art saw blades:

- **SlickCut White:** Our 24-tooth blade is the choice for sheet metal of all types. Easy cutting with less vibration and less operator fatigue.
- **SlickCut Silver:** 14 TPI in a 6" blade. Great for stainless and other tough to cut metals. This blade is coated with *SlickSilver*. a proprietary coating, like that used on the bows of icebreaker ships. It provides a surface that can stand up to the toughest job.

Our blades are exhaustively tested.

In blind tests:

- SlickCut Silver blades made 135 cuts
- The second-best blade = 60 cuts
- The average blade = 35 cuts

### Options

Part #	Style	Size	Teeth Per Inch
90935	SlickCut Silver	6"	14 TPI
90936	SlickCut White	6"	24 TPI
