

Metal Mover[®] Fiber Discs

Aggressive Option for grinding and finishing

Features

- Self-sharpening ceramic grain that continuously fractures to expose fresh cutting edges
- Reduced heat = less warping and discoloration. Outlasts conventional discs by 2-3x
- High performance from first to last pass
- Consistent cut rate & cooler grinding.

Overview

Rockmount's Metal Mover Fiber Discs are built for aggressive material removal, long life, and cooler grinding. Much more aggressive than a flap wheel but has the same feel when grinding with it. Featuring self-sharpening ceramic grain, these discs cut faster and last longer—keeping productivity high and downtime low.

Product Options

Part #	Description	Size/Grit
8801	4.5" Fiber Disc	36
8802	4.5" Fiber Disc	60
8803*	4.5" Backing Pad	5/8"-11, Threaded
8804*	5/8"-11 Locking Nut	1-1/2" Flange Holes
8805	Back Up Pad & Lock Pad Nut	

* Required reusable accessories for Fiber disc use

Best Practices

- Use Proper PPE
- Use on 4.5" electric angle grinder
- Not recommended for Aluminum
